

Cost Outlier Payment

Reimbursement Policy ID: RPC.0043.6400

Recent review date: 02/2024

Next review date: 12/2025

AmeriHealth Caritas Florida reimbursement policies and their resulting edits are based on guidelines from established industry sources, such as the Centers for Medicare and Medicaid Services (CMS), the American Medical Association (AMA), state and federal regulatory agencies, and medical specialty professional societies. Reimbursement policies are intended as a general reference and do not constitute a contract or other guarantee of payment. AmeriHealth Caritas Florida may use reasonable discretion in interpreting and applying its policies to services provided in a particular case and may modify its policies at any time.

In making claim payment determinations, the health plan also uses coding terminology and methodologies based on accepted industry standards, including Current Procedural Terminology (CPT); the Healthcare Common Procedure Coding System (HCPCS); and the International Classification of Diseases, 10th Revision, Clinical Modification (ICD-10-CM), and other relevant sources. Other factors that may affect payment include medical record documentation, legislative or regulatory mandates, a provider's contract, a member's eligibility in receiving covered services, submission of clean claims, and other health plan policies, and other relevant factors. These factors may supplement, modify, or in some cases supersede reimbursement policies.

This reimbursement policy applies to all health care services billed on a CMS-1500 form or its electronic equivalent, or when billed on a UB-04 form or its electronic equivalent.

Policy Overview

This policy describes payment of cost outliers for inpatient and outpatient services by providers contracted with AmeriHealth Caritas Florida and/or participating with Medicaid.

AmeriHealth Caritas Florida will align with the Department of Medicaid by utilizing the state's guidelines to calculate inpatient cost outlier reimbursement for covered services as well as enhanced ambulatory patient group (EAPG) cost outlier reimbursement for outpatient services.

When the agreed-upon inpatient contract between AmeriHealth Caritas Florida and hospitals specifies a percent above 100% of the Medicaid rate, the diagnosis-related group (DRG) base rate will be increased by this percent. Any outlier reimbursement will be calculated at 100% of the Medicaid rate using the enhanced base rate.

When the agreed-upon outpatient contract between AmeriHealth Caritas Florida and hospitals/ambulatory surgery centers utilizes EAPG pricing and specifies a percent above 100% of the Medicaid rate, the base rate will be increased by this percentage. Any outlier reimbursement will be calculated at 100% of the Medicaid rate using the enhanced base rate.

Reimbursement Guidelines

Medicaid inpatient admissions are reimbursed under a prospective payment system that includes pre-established, fixed amounts for each admission based on diagnosis-related groups (DRGs) or All Patient refined diagnosis-related groups (APR-DRGs).

Medicaid outpatient services may be reimbursed under a prospective payment system that includes enhanced ambulatory payment groups (EAPGs). EAPGs may be used in outpatient prospective payment systems (OPPS) for a variety of outpatient settings, including hospital emergency rooms, outpatient clinics, and same-day surgery.

Medicaid makes outlier payments to hospitals or ambulatory surgery center (ASC) facilities to help cover significantly higher costs for certain inpatient admissions and outpatient services. Cost outlier reimbursement is based on the percentage of charges above and beyond the APR-DRG, DRG, and EAPG rates. A hospital inpatient admission qualifies as an outlier if it exceeds certain cost or charge thresholds. For example, if a discharge is eligible for an outlier payment, the payment will be equal to a specified percentage of the value of eligible outlier costs by the plan. Outpatient services exceeding certain cost or charge thresholds will be reimbursed similarly.

The premium payment (percent above Medicaid) would apply only to the base rate of the DRG/APR-DRGs or EAPGs that is on the state fee schedule. The AmeriHealth Caritas Florida payment is based on this rate. Outlier payment is calculated separately, as opposed to the DRG/APR-DRG/EAPG payment, which would be based on the enhanced contracted base rate.

Definitions

Base rate

Hospital specific values used to determine the DRG and EAPG outlier costs.

Cost outlier

Inpatient services provided during a single visit that have an extraordinarily high cost as established by Medicaid are therefore eligible for additional payments above and beyond the base rates of DRG or APR-DRG.

Enhanced ambulatory payment group (EAPG)

The enhanced ambulatory payment group (EAPG) system is designed to classify outpatient services into groups that utilize similar resources and have similar costs. The EAPG system also applies discounting factors which could cause a detail line to consolidate, package, or discount.
